12 Rules for Life: An Antidote to Chaos is a self—help and bestselling book written by Dr. Jordan Petersen. Dr. Petersen is a clinical psychologist and psychology professor, which is one of the most important reasons why he decided to write this book.

Some of the most important things the author discusses in his book are abstract principles about life in general and the influence of biology and other subjects, such as religion, myth, and the author’s professional experience. When compared to his previous work *Maps of Meaning: The Architecture of Belief*, 12 Rules for Life is written in a much more reader—friendly and accessible style of writing, which is definitely a good thing, both for the author and for readers.

This summary will be divided into several parts. The first part—the introduction serves as a short intro of the book. The second part—the summary—will be the largest and the most detailed part, because it will contain much information and details from the original book. After the summary, there is a book analysis, where we will analyze some of the key points from the book. A quiz with its answers will be the part of the summary where our readers will have the opportunity to test everything they learned about the book from the summary section. The last part will be the conclusion of the book. If you are ready, please proceed to the summary section.
